

T1200

TOSHIBA

T1200

Go places with the T1200. And don't leave your office behind. The T1200 has the full performance of a powerful desktop computer all packed into a portable package. No wonder it's a worldwide bestseller.

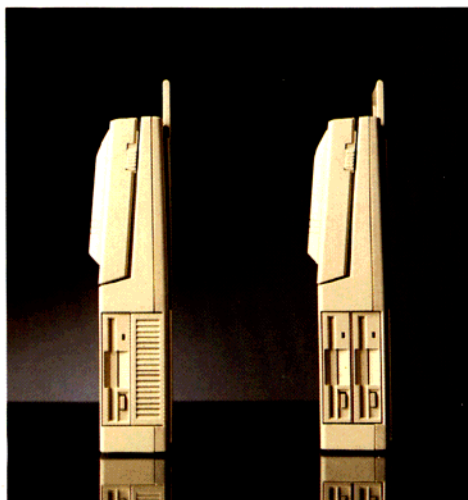

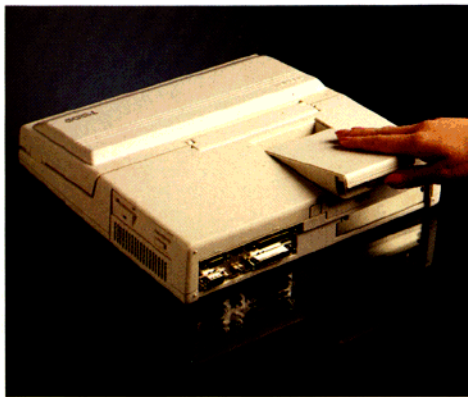

CLASS LEADER.

The T1200 has the power features you'd expect from a desktop system. But it weighs as little as 4.8 kg (10.6 lb) and fits in your briefcase. You'll be impressed by the speed. Tests show that the performance of the T1200 with its 9.54 MHz Intel 80C86 approaches that of many AT compatibles. 1-2 MB RAM is unheard of on a machine in this class – but the T1200 has it. And it comes with hardware supporting the LIM Expanded Memory Specification so you can use the T1200's extra memory to make your computing even more effective. The T1200 is well equipped for connectivity with a full set of standard interfaces and an 8-bit Toshiba slot for a Toshiba modem or other third party card.

THE TOSHIBA DIFFERENCE.

There are actually two T1200s. The T1200HB comes with a 20 MB hard disk and a 3.5" 720 KB diskette drive. A dual diskette drive version, the T1200FB, is also available for users demanding less storage and even less weight. Both offer handsome Toshiba styling and comforts other portables don't. Like Toshiba AutoResume™ for a fast start. LIM-EMS expanded memory. Toshiba Hard RAM, an ultra-fast hard disk in battery-backed RAM that does not disappear when you turn the machine off. A high-contrast backlit display with 640x200 bit-mapped graphics. And removable, rechargeable batteries offering up to three hours battery life. With all these extras, you can be sure that there is no better computer in its class. And Toshiba stands behind the T1200 with Toshiba service. Quick. Professional. Worldwide.

So ask your nearest Toshiba dealer for hands-on demonstration today. And go places with the T1200.

Specifications

Processor

Intel 80C86 CPU 9.54 or 4.77 MHz clock speed, switchable

Memory

Standard 1 MB (1024 KB) RAM, maximum 2 MB RAM
RAM above 640 KB can be used as a fast, battery-backed RAM disk drive (Toshiba Hard RAM) and/or expanded memory (LIM-EMS)

Hard Disk

20 MB formatted capacity (T1200HB)
Can be turned off to save power

Diskette Drives

One 3.5" 720 KB diskette drive (T1200HB)
Two 3.5" 720 KB diskette drives (T1200FB)

Display

Backlit Supertwist display, up to 640 x 200 dot resolution
80 characters x 25 lines, swivel-mounted up to 180 degrees

Graphics Adapter

CGA compatible

Expansion Slots

Toshiba 8-bit slot

Interfaces

RS-232C serial port, Centronics parallel port, RGB colour monitor port, composite video port, numeric keypad port

Keyboard

Sculptured full-size 82 key keyboard, integrated numeric keypad, dedicated cursor keys

Operating System

MS-DOS 3.3

Clock/Calendar

Backed-up by lithium battery

Size

309x305x73 mm (W*D*H) (12.1"x12.0"x2.9")

Weight

T1200FB: 4.8 kg (10.6 lb) T1200HB: 5.2 kg (11.5 lb)

Power Supply

Rechargeable, removable NiCd battery, runs up to 3 hours on one charge
Autosensing 100-240 VAC adapter/charger for worldwide usage

Options

Memory Expansion

A 1 MB expansion card is available to increase RAM to 2 MB internally. Added memory can be used as an ultra-fast Hard RAM disk and/or as expanded memory (LIM-EMS).

5.25" 360 KB Diskette Drive

An external 5.25" diskette drive with a capacity of 360 KB is available to allow data exchange with personal computers not yet supporting 3.5" media.

Internal Toshiba Expansion

Hayes-compatible modem where approved E/LAN - Ethernet-compatible LAN card

External Expansion Units

External expansion units are available with slots for up to five Industry-Standard option cards. These include, for instance, network adapters, host communication, modems, additional hard disk drives, memory expansion, and graphics adapters. This multitude of expansion possibilities makes the T1200 a secure investment for future developments.

Quick Multi-Battery Charger

An optional multi-battery charger handles three battery packs and recharges in just 1.5 hours. Since the T1200's batteries are rechargeable and removable, it is possible to carry spare batteries for a practically unlimited supply of power on the road

External Numeric Keypad

You can add an external numeric keypad to your T1200 for number-intensive data entry. A port on the side of the machine permits easy connection.

LapLink

For quick diskless data transfer between Toshiba portables and other Industry-Standard computers.
