

GLOBAL VILLAGE

56K PC Card Fax/Modem

V.90* and K56flex

The #1 Choice for Fast Internet Access from Your PowerBook®!

Cruise the Web and remotely access your company network at extraordinary speeds up to 56 Kbps over standard phone lines with the lightning-fast Global Village 56K PC Card! The Global Village 56K PC Card delivers the ultimate in speed, versatility and convenience, on the road or in the office.

Quality You Can Trust

Optimized for PowerBooks, the Global Village 56K PC Card includes features you just won't find with other 56K PC Cards. Award-winning GlobalFax™ software, enhanced hot swapping, on-screen status display and more! Plus, our 56K PC Card features flash ROM and flash DSP technology, maximizing upgradability as standards evolve. It's the unbeatable value that's made Global Village the preferred brand of fax/modems among PowerBook owners everywhere!

With speeds of up to 56 Kbps, the 56K PC Card cuts Web page and remote access downloading time almost in half!

• **Rugged dual-port connector**
Two standard RJ-11 phone jacks let you use the same line to hook up both the modem and a separate telephone.

• **Safety release**
The phone-line connector not only attaches to the card firmly, but it releases under stress, preventing damage to the card and your PowerBook.

• **Digital line protection**
Unlike most PC Cards, the Global Village card includes special circuitry in the phone-line connector, acting as a front line of defense from electrical surges and digital telephone systems.

• **Cellular capable**
Connect directly to a cellular telephone for wireless data communications.**

This modem is 56 Kbps capable; however, phone line conditions or regulations may limit download speeds to 53 Kbps or less.

* As determined February 1998 by ITU-T.

** You can order a Cellular Connection Kit by visiting <http://www.globalvillage.com/orderform> or have an order form faxed to you by calling (800) 890-4562 and requesting sales document #3005.

The following cellular phones are supported:

- Mitsubishi
- Nokia 232 and 2120
- Motorola Microtac and Elite

For Macintosh® PowerBook

GLOBAL VILLAGE

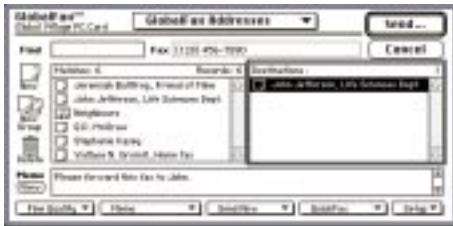

56K PC Card Fax/Modem

V.90 and K56flex

Blast onto the Internet at High Speeds Right from Your PowerBook!

Award-winning GlobalFax™ software

The critic's choice. Send, receive, view, print, and manage faxes right from your PowerBook. Features designed with mobile users in mind including multiple dialing locations, advanced calling card dialing and more.

Faxing as easy as printing

Just hold down the Option key and the File menu Print command becomes a Fax command—in any application.

On-screen status display EXCLUSIVE!

Monitor modem connection status and performance information conveniently—in any application.

QuickLauncher™ EXCLUSIVE!

Fully customizable, access all of your communication software right from your PowerBook's desktop.

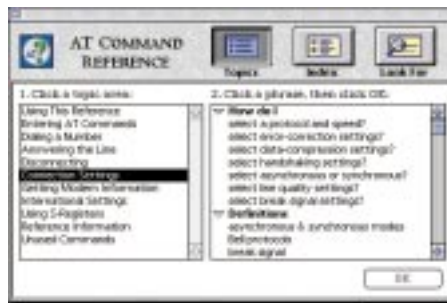

Your Complete Internet Solution

56K PC Card package includes:

- 56 Kbps PC Card
- Dual-port connector (two RJ-11s)
- Telephone cable
- PC Card user's guide
- Disks with the following software:
 - GlobalFax and GlobalFax user's guide
 - On-line Apple Guide AT Command Guide

Automatic card detection and enhanced hot swapping EXCLUSIVE!

Eject and swap PC Cards without restarting your system or relaunching any software. Be assured that your communication applications will automatically "find" the PC Card, even if it has been moved from one slot to the other.

Apple Guide on-line help EXCLUSIVE!

Provides clear, convenient on-screen assistance when you're using AT commands for custom modem operations.

Enhanced maximum throughput EXCLUSIVE!

New! Automatically supports throughput rates up to 230 Kbps and beyond in any application to maximize performance when downloading compressible files.

Software-upgradable DSP technology

Global Village's PC Cards feature flash ROM and software-upgradable DSP technology, maximizing upgradability as future standards evolve.
