

Designed and Optimized to Fully Utilize Your PCI Expansion Port!

56K WINSTORM

INTERNAL V.90 DATA/FAX MODEM

UNLEASH THE POWER OF THE INTERNET

Because the WinStorm™ modem was designed specifically to work with Windows® 95 and Windows 98, you can get better overall performance over standard modems. Boca Research has designed the WinStorm modem to work efficiently with not only your operating system but with your computer as well. WinStorm works directly with your PC's onboard processor to deliver fast performance whether you are surfing the Internet, sending an e-mail or receiving a fax. WinStorm comes with software drivers that automatically and effortlessly install your modem for true Plug and Play convenience.

POWERFUL DESIGN!

This 56K WinStorm Modem was designed to work with the universal PCI interface. Virtually all Pentium® PCs ship with an open PCI slot. The PCI interface is a 32-bit bus with significantly higher-performance advantages over the 16-bit ISA bus used by most other modems. And PCI modems are a breeze to install, so surf the world on your new 56K WinStorm modem today.

Included **FREE** is the Boca MegaMedia CD-ROM, with a collection of software for faxing, e-mail, browsing and file transfer.

*This modem incorporates the V.90 standard. The actual transmission speed of information downloaded from your Internet service provider will vary depending upon telephone line conditions and power output from your provider. Due to FCC limitations, speeds in the US are less than 56 Kbps. The FCC limitation is 53 Kbps per individual analog telephone line connection. Upstream transmissions to your provider occur at speeds of up to 33.6 Kbps.
