HEWLETT PACKARD

HP OMNIBOOK 530

Superportable PCs

Technology for Freedom - No other PCs are as ready to go and easy to use, right out of the box.

If you always wanted to have the capabilities of a desktop PC when travelling, but wanted to enjoy a small, lightweight form factor, the HP OmniBook 530 Superportable PC might be just what you've been dreaming about.

At 1.3 kg (3 lbs), they're the smallest notebook PCs available today with a full- ⸱ ⸱ keyboard. And with MS-DOS® and Microsoft® Windows pre-loaded on a 130-Mbyte PCMCIA hard disk, and a pop-up mouse at hand at the touch of a button, they'll always be ready when you need them.
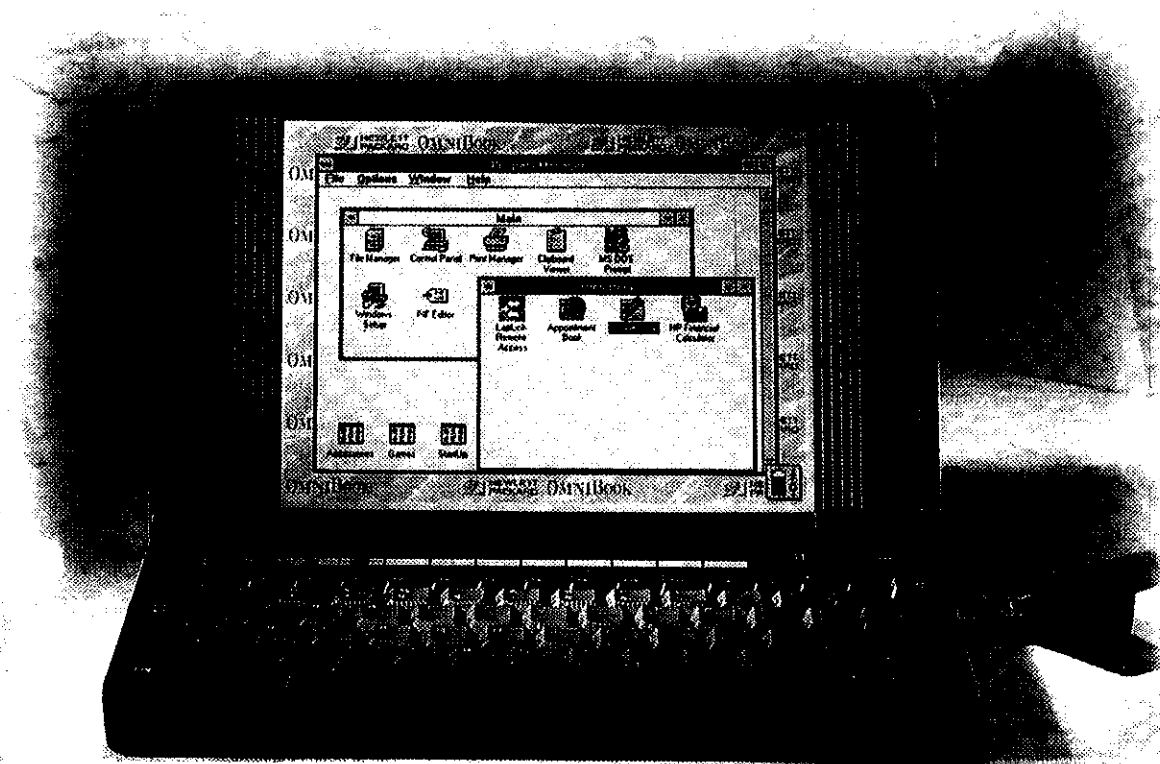

With a VGA-out port, an external 3.5-inch floppy disk drive, and infra-red data transfer, communication with external sources couldn't be simpler.

You don't even need to close an application before switching off your HP OmniBook. Simply turn it off. When you switch back on again you're right back where you left off.

F1052A HP OmniBook 530 Superportable PC-
with 130-Mbyte PCMCIA Type III
hard disk, 3.5" external floppy
disk drive and 4-Mbyte RAM

Built-in MS-DOS data compression doubles capacity to 260 Mbytes.
